

The KULUMI X is a compact and water-resistant solar powered audio player with high sound quality, 8GB internal memory, 3 levels of content navigation, rechargeable Li-ion battery and built-in solar panel.

Built-in 1W Speaker

The high sound quality of the KULUMI X is one of the most important aspects of this audio player. It allows up to 10 people to hear the audio content clearly. In gatherings and study sessions, it is often used to play songs, stories and educational materials.

Audio Player with 8GB Memory and 3 Levels of Content Navigation

A small device with big memory. The KULUMI X has an internal memory of 8GB. The buttons are sturdy and allow you to easily navigate the 3 levels of content: Main/Root folder, Sub folder and File.

Durable, Compact and Lightweight

Dimensions: 50 mm x 19 mm x 100 mm
Weight: 75 g

The KULUMI X has durable rubber covers and a water resistance rating of IP65.

0.4W Solar Panel

Nothing can rival our free source of power: Sunlight. Whether you are in an area without access to electricity or encounter a sudden power outage, the solar-powered X will keep playing.

Rechargeable battery

The 3.7V / 500mAh Li-ion battery (500 charge cycles) can be recharged via the solar panel or the included micro-USB cable. Charge time via solar panel: 8 to 10 hours in full sunlight. Charge time via power adaptor/5V@1A source: 2 to 3 hours. The KULUMI X can be used for 6 to 8 hours.
